## DETAILED ACTION

### *Information Disclosure Statement*

The information disclosure statements filed MAR-2004 and MAY-2005 comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609. Accordingly, they have been placed in the application file and the information referred to therein has been considered as to the merits.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 60 is rejected under 35 U.S.C. 102(b) as being anticipated by Chesley et al. (US Pat. 5,505,747).

Chesley et al. teaches the claimed abrasive sheet product, comprising: a sheet-form base having an integral array of fastener elements (figs. 1 and 5); and a substrate having abrasive on the surface thereof, wherein the substrate is laminated to the sheet-form base (4:1-35 and figs. 1, 5).

Claim 60 is a product-by-process claim. Product-by-process claims are not limited to the manipulations of the recited steps, but only to the structure implied by the steps. "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached form PTO-892.
